ELEMENT MARKETS

**Company:** Element Markets

**Position:** Generalist Engineering Internship

## JOB DESCRIPTION

- » Help manage the development of the beneficial use component of landfill gas and other renewable energy projects, including developing project pro-formas, process review, selection of equipment, and selection of vendors.
- » Work with Element Markets (EM) sales and origination team to identify key markets for gas and power off-take, develop EM's go-to-market strategy, and product offering.
- » Track developments in renewable energy, landfill gas and natural gas markets, as well as the rules and regulations governing gas and power off-take.
- » Help team respond to RFPs and submit project development proposals.

## REQUIREMENTS

- » Interest in renewable energy, power markets, and carbon markets.
- » Undergraduate education in engineering.
- » Coursework in finance or business a plus.
- » Graduate degree in finance or business a tremendous plus.
- » Excellent oral and written communications skills.
- » Strong Excel, PowerPoint, and other Microsoft Office skills.
- » Team player that thrives in a fast changing environment.
- » Resourceful self-starter who has demonstrated abilities to work with limited supervision.
- » Unquestionable integrity and credibility.
